Portway Luxima Closure Plate Trim Kit Installation Instructions

The closure plate trim kit is sized for suitability for use with either the closure plate as supplied or a cut down version of the closure plate. The trims can therefore be cut down to suit the installation being undertaken, in line with re-sizing of the closure plate. 3 off trims are provided, a L/H, R/H and Top Trim, they are fixed to the closure plate to hide the sealing tape / fixing screws as shown below in figure 1. Closure plate trims are supplied with a protective film that should be removed prior to installation and hence will provide a level of protection to the trims whilst being cut down if required.
